

The background of the entire page is a photograph of an offshore oil rig. The rig is a complex structure with many levels, pipes, and a large derrick. It is situated in the middle of the ocean. The sky is a mix of orange, yellow, and dark blue, indicating a sunset or sunrise. The sun is a bright, glowing orb on the horizon, casting a long, shimmering reflection across the water's surface. The water is dark blue with some white-capped waves in the foreground.

GPT[®] **SERVICES**

C O R P O R A T E P R O F I L E

GRUPO WALWORTH® specializes in providing products, services, equipment, and parts for flow solutions to the petrochemical, oil and gas, energy production, water, pulp and paper, cryogenic and geothermal industries, among others.

GPT Services® Certifications

We are committed with quality, environmental care, safety, occupational health and anti-bribery.

Alliances and Representations

INTEGRAL SOLUTIONS IN PIPELINE INTERVENTION

With a proven trajectory, we are a leading company in the implementation of integral and specialized solutions for the preservation and reliability of the infrastructure of the Oil & Gas energy sector.

- Pipeline intervention
 - *Hot Tapping*
 - *Line Stopping*
- Specialized welding
 - *In-line service*
 - *Open root*
- Civil and mechanical work
- Controlled torque
- Cold cut
- Operation and maintenance preventive / corrective duct networks, from 2" to 48"
- *Hydrostatic / Pneumatic tests*
- *Non-destructive Examinations*
- *Complementary services*

SPECIALIZED PROCUREMENT

- Valves
- Actuators
- Piping and fittings
- Extruded and fabricated fittings
- Installation and supply of API 6A wellheads and Christmas Tree valves
- Nipples, coupons and injectors for pipeline corrosion control
- Process skids and loading arms

We are the leading service company of GRUPO WALWORTH®, providing solutions in the Oil & Gas energy sector, upstream, midstream and downstream.

We have capabilities for any execution: onshore, offshore, subsea, "inside the fence" complex, storage terminals and pipelines of every service and operational conditions.

We have an Integral Management System, that meets the requirements of the standards ISO 9001 (Quality), ISO 14001 (Environmental care), ISO 45001 (Safety and Occupational Health) and ISO 37001 (Anti-Bribery)

- Integral solutions and specialized services
- Complementary services and consulting
- Specialized procurement, representations and technologies of a high added value

ENGINEERING AND MANUFACTURING

We focus on the manufacture of specialized machinery and accessories for HT & LS, meeting the quality standards required by the industry. Committed to the implementation of new developments for the Oil & Gas sector, offering cutting-edge products that allow optimization of operation and execution times.

- Design and manufacture of equipment for HT&LS
 - Hot Tapping machines
 - Line Stopping machines
- Manufacture of mechanized pieces of special design
- Floating gates valves
- Cutters and drill bits
- Adapters and holders

Inova is our business unit for supplying:

- Pressure vessels customized to customer specifications or custom designed, all under ASME Section VIII Division 1 code
- Pigging systems (Trap)
- Warm caps
- Manufacture and installation of Natural Gas regulation and measurement stations (City Gate)

YOUR BEST CHOICE FOR INTEGRAL SOLUTIONS

- Execution integral projects (Turn Key Project)
- Perform Hot Tapping services complying with the standard API 2201
- Integral Management System certified in the ISO standards: Quality, Environmental Care, Safety, Occupational Health, and Anti - Bribery
- Local presence for immediate attention and availability
- Project Management discipline
- In - line and open root welding services complying with standard API 1104 and ASME
- Specialized staff
- Specialized technical seminars: Hot Tapping & Line Stopping, Welding, Valves, among others
- Hot Tapping equipment from 2" - 48" diameter, with horizontal, vertical, and /or angular shooting orientation
- Line Stopping equipment from 2" - 48" diameter, for execution of simple, double or greater complexity projects with or without by-pass
- Capacity of subsea pipeline intervention

WOODFIELD

Woodfield Systems International is a premier design, manufacturing, sales & service organization providing customized bulk fluid handling and safety access solutions for loading and unloading product in the Oil & Gas, chemical, petrochemical, cryogenic and aviation sectors.

Woodfield Systems factory loading arms, land and marine, secure access systems, flow and gas measurement skids, integrating a complete solutions to meet customer needs.

An ISO 9001:2015, ISO 14001:2015, ISO 45001:2018, PED:CE and AD 2000 - Merkblatt HP0 / DIN EN ISO 3834 - 2 integrated quality management system and a passionate leadership team, Woodfield Systems continues to keep all our clients and team members in good hands.

- Top and Bottom Loading Arms
- Metering & Process Skids
- Safe Access Systems
- Floating Suction Units
- Marine Loading Arms
